

- > The institutional investor, **Caisse des Dépôts**, is investing in the wind farms owned by **La Compagnie du Vent**, a subsidiary of ENGIE Group, a key player in the renewable energy sector.
- > Drooms is working alongside **La Compagnie du Vent** throughout this process, which is set to contribute to the rapid expansion of renewable energy in France.

CONTEXT

- > The sale of three wind farms (Oise, Yonne and Marne) which started operation in 2015 with a total power output of 73.6 MW, equivalent to the annual consumption of 72,500 people.
- > An investment of EUR 100 million.
- > Strategic priorities:
 - Caisse des Dépôts > Providing support for the energy transition
 - La Compagnie du Vent > Financing operations for the development and growth of the French wind farm potential

REQUIREMENTS

- > Conducting technical, legal and financial due diligence
- > The provision of thousands of documents needed to complete the transaction
- > Simultaneous access for the various players involved with no space or time constraints

SOLUTIONS

- > Setting up a data room which will bring together all the documentation regarding the assets
- > Configuration of an integrated question and answer (Q&A) platform
- > Supervision by experienced project managers and a 24/7 hotline

ADVANTAGES

- > A reduction of several weeks in the time allocated to the due diligence process
- > Savings in resources for the stakeholders thanks to the immediate posting of documents, including technical drawings
- > Fluid and rapid processing of hundreds of incoming questions
