

DROOMS FACTSHEET

Maximum security, reliability and GDPR compliance with Drooms

Drooms takes the handling of confidential documents extremely seriously and safeguards client data using the highest security standards and handling protocols available.

How we protect your confidential data

- **Digital sovereignty:** As a European-owned and -controlled platform, our overall system set-up and the data processing and storage in Europe are GDPR-compliant and ensure full digital sovereignty for your confidential information.
- **Servers:** Your data is securely processed and stored within secure, georedundant European server infrastructure. All data remains within this infrastructure unless accessed or downloaded by you or permitted users you invite to the platform.
- **Artificial Intelligence:** Drooms' AI is developed in-house and lives inside the sovereign, well-governed platform. Live client data is never used to train our AI, nor is shared with external public AI models.
- **External security audits:** Drooms GmbH is ISO 27001:2022 and 27018:2020 certified.
- **Compliance:** Drooms GmbH is a European data room provider and compliant with the EU General Data Protection Regulation (GDPR).
- **In-house support staff:** Technical and customer support services are carried out directly by vetted Drooms employees.
- **Vulnerability management:** Regular penetration tests are carried out to assess data security.

- **Overall system stability:** Drooms keeps data confidential, secure and highly available with N+1-concept, encryption at rest and a secure tier architecture.
- **Insurance:** Drooms GmbH is covered by professional liability insurance up to 10.000.000 EUR and has cyber insurance up to 10.000.000 EUR.

Data room features that support secure work processes

- **IP filtering:** The possibility to limit data room access at group level with specific IP addresses is available.
- **Multi-factor authentication:** Protect your Drooms accounts from identity theft by requiring an additional sign-in code sent via SMS.
- **High-end encryption:** For premium security, data transfers are protected via TLS connections enforcing modern encryption algorithms & ciphers that provide forward-secrecy.
- **User rights and permission controls:** Grant review, print, and download authorisations down to the user and document level, and enable dynamic watermarking.
- **Redaction:** AI-powered, integrated Redaction allows you to protect sensitive information accurately and quickly without the need to run third-party software.

Drooms and innovation

- **In-house technology:** Drooms automates workflows, reduces friction and speeds up deal timelines. To ensure a high standard of security and quality, Drooms develops its technology and AI in-house, instead of relying on third-party products.
